

# Installing Solar at Your Business:

**USAID**  
FROM THE AMERICAN PEOPLE

*What to expect when you sign up with the Jamaica Energy Resilience Alliance (JERA)*

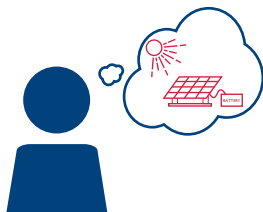

## Visit the JERA website

Learn how your business can go solar and help strengthen Jamaica's energy sector resilience:

<https://cadmusgroup.com/cp/jamaicaenergy/>

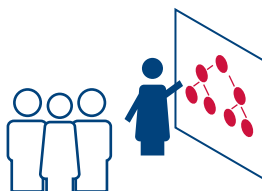

## GETTING STARTED

Sign up on the JERA website to indicate your interest in going solar. You will provide your contact information, energy consumption (found on your electricity bill), and ownership preference.

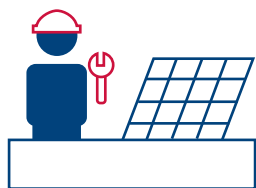

## FINANCING

JERA partners will go over your system design and PV/PV+ financing options with you. Specific terms and requirements will depend on the financing type, including direct financing or leasing.

## PERMITTING, LICENSING, AND INSTALLATION

Your JERA partner will obtain permits in accordance with local regulations and expert technicians will work to install your PV/PV+ system.

## SCOPING, ASSESSMENT, AND DESIGN

You will be matched with a JERA partner who will conduct a site visit, review your business' energy needs, and provide options for suitable PV or PV plus battery storage (PV+) projects. After discussing anticipated savings and receiving your approval, your JERA partner will design the proposed PV/PV+ system.

## CONTRACT SIGNING

Once you agree on the benefits of your PV/PV+ system, you will sign an agreement with JERA partners for installation and financing. Your JERA partner will support you throughout the installation process.

## SITE INSPECTION AND INTERCONNECTION

Your JERA partner will coordinate an inspection with the utility. Upon passing inspection and receiving interconnection approval (if applicable), your PV/PV+ system can begin generating power and saving you money.

JERA's engagement with your business is supported by USAID under the Strengthening Energy Sector Resilience in Jamaica project, which is co-funded by USAID Jamaica and JERA. USAID does not fund or finance PV/PV+ installations.
