INSTALLING SOLAR FOR SMEs IN JAMAICA

What To Expect When You Sign Up With The Jamaica Energy Resilience Alliance (JERA)

1 GETTING STARTED

JERA provides a one-stop shop of no cost technical assistance for you as you get started on your solar journey. Sign up on the JERA website (www.cadmusgroup.com/cp/go-solar) to indicate your interest in solar and battery storage. You will provide your contact information and your ownership/financing preferences.

2 PV INSTALLER SELECTION

JERA can provide a curated list of installers so you can receive quotes for the installation of a PV or PV+ system. The PV installer you select will present a basic proposal with quotes and financing options for your approval to proceed with the system design. JERA can review the proposal to support your decision-making process.

3 FINANCING

Once you approve the project design and quote from your selected PV installer – or at any time at your request – **JERA will share a list of options for PV and PV+ project financing.**

4 INSTALLATION AND COMMISSIONING

Your selected PV installer will coordinate procurement, permitting, licensing, installation, interconnection, and commissioning. Upon passing inspection and receiving interconnection approval (if applicable), your PV or PV+ system can begin generating power and saving you money.

5 PRELIMINARY ASSESSMENT

You will provide a copy of your latest electricity bill for **JERA's independent energy experts to complete a preliminary assessment of how you may integrate solar PV or solar PV plus battery storage (PV+) into your business operations**, to determine possible system design and size options that would provide technical and economic benefits. JERA can also review proposals you may have received from PV installers in the past.

6 ENGINEERING AND SCOPING

Your selected PV installer will work closely with you to develop a more detailed project proposal for your approval, which will include system design, financial and economic analysis, and implementation plans. In collaboration with your selected installer, **JERA will be available to you to answer questions, review materials, and support you as you move forward.**

7 CONTRACT SIGNING

Once you have reviewed the proposal and financing terms, you will sign the PV installer contract to proceed with the system procurement and installation. **JERA's energy experts are available to explain proposal terms.**

JERA's engagement with your business is supported by USAID under the Strengthening Energy Sector Resilience in Jamaica project, which is co-funded by USAID Jamaica and JERA. USAID does not fund or finance PV/PV+ installations.
